

Dear Candidate,

This is a remote role with a requirement for travel to London for monthly meeting. Our dynamic and highly experienced teamwork with a range of clients, including major developers, councils, architects, mechanical & electrical consultants, and independent contractors, delivering new and existing building energy and sustainability consultancy.

Consult Sustainability works in partnership with Focus 360 Energy Ltd , an independent sustainability consultancy, who focus on high quality construction and surveying consultancy for a wide range of clients across all types of property.

Job Role:

- To support the team in delivering SAP calculations and Energy Performance Certificates.
- To assist in providing energy and sustainability consultancy and energy strategy reports.
- To assist in the growth of team and services it provides.

Responsibilities & Duties:

Your role will require you to undertake several duties including:

- Undertaking energy assessments/modelling & EPCs for new and existing buildings.
- Preparing energy strategy and decarbonisation reports.
- Liaison with construction team professionals and clients to provide advice on meeting legislative targets.
- Providing advice on reducing energy, CO2 emissions and construction costs.
- Attendance at meetings to contribute to the building design process.
- Travelling independently to sites when required.

Minimum Qualifications & Skills:

- New Build Domestic Energy Assessor (OCDEA), (Minimum 1 years' experience).

- Good understanding and knowledge of construction, sustainability and building regulations.
- Excellent communication skills.
- Organised and structured with a professional outlook and good interpersonal skills.
- IT competent.
- AutoCAD competent. Desired, but not essential.
- Effective team player and highly driven.
- Clean driving licence and access to own vehicle.

**Additional Skills:**

- Non-Domestic Energy Assessor (NDEA)
- Experience with Overheating Assessments
- Thermal modelling competent
- Report writing

**Opportunities:**

- To become a key person in an expanding business.
- To expand knowledge and assessment skills from structured training programme.
- To become experts in field of work.
- To work alongside other in-house construction professionals to gain wider understanding of construction professions.
- Potential to cross work with other professionals including the Surveying/M&E/Architectural teams.
- Expansion into other sustainability assessment areas.

**Job Details:**

- Permanent full-time position.
- Competitive salary, according to experience.
- Professional subscriptions paid.
- Structured training programme.
- Flexible office/home working hours.
- 25 days holiday.
- Team days out.

To apply - please send CV with covering message explaining why you are suitable for this position

Absolutely no agencies, job boards, etc or unsolicited approaches from anyone other than direct applicants.

Only successful candidates will be contacted for interview at Stage 1 – anticipated to be week commencing 1st January 2022

Consult Sustainability are an equal opportunities employer and positively encourage and welcome applications from all suitably qualified and eligible.

Your Sincerely

Sam Guest (Founder)
