Retrofit Training and Accreditation with Elmhurst

Backed by 30 years of industry experience and knowledge, Elmhurst boasts the largest membership of Retrofit Professionals in the UK.

Want to develop retrofit roles in house? As one of the leading experts in whole house retrofit, Elmhurst has forged partnerships with third-party training providers who can deliver the required knowledge and expertise for individuals to become Retrofit Coordinators.

In addition to this, Elmhurst can directly deliver domestic energy assessment and retrofit assessment training should housing providers want to take greater control of the initial property assessment process.

Those who have completed the training and gained the necessary qualification will be eligible to join Elmhurst's coveted TrustMark Approved Whole House Retrofit schemes.

Approved members can legally work within the retrofit supply chain; managing retrofit projects across the UK and producing plans/reports in accordance with PAS 2035.

Receive Expert Technical Support

We have the UK's largest team of retrofit experts, here to support you in your role. Our team will work with you to resolve any issues you may have, even when you are out on site!

Streamline your retrofit work

Take advantage of Elmhurst's comprehensive suite of mobile and online retrofit tools, designed to streamline the delivery of quality retrofit services to both clients and your project team.

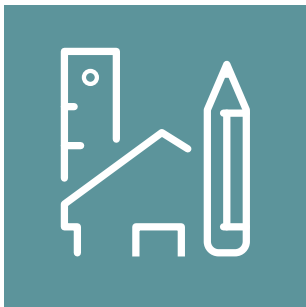

Take advantage of our integration with ECOSURV

We are directly integrated with the ECO Surv PAS 2035 Workflow platform, **making managing and completing your retrofit projects easier and more streamlined.**

Retrofit Tools with Elmhurst

Elmhurst members can access cutting-edge mobile and desktop solutions, which will help them to deliver the key assessments and reports required for retrofit projects.

Improvement Evaluator Software

This innovative online tool has been developed for Retrofit Coordinators to effortlessly model improvement measures for risk paths B and C retrofit projects, as well as generate comprehensive Improvement Option Evaluation Reports. This unique tool stands unrivalled in the industry, providing retrofit professionals with an intuitive and time-saving solution.

Mobile Assessment Solutions

Our mobile solutions have been meticulously developed to prioritise user-friendly interfaces and streamlined efficiency. RdSAP Go and Condition Report Go, are designed to empower Retrofit Assessors in assessing and reporting on the energy performance and condition of properties, essential for a comprehensive retrofit assessment.

Occupancy Assessment Tool

With Elmhurst's online Occupancy Assessment tool retrofit professionals can deliver an accurate appraisal of occupancy within a household, which is invaluable when developing improvement plans for retrofit projects or otherwise. We offer a basic occupancy assessment solution within our Condition Report App, or for those wanting a more comprehensive assessment of occupancy, we have a standalone online tool available to use.

ECO Surv PAS 2035 Workflow

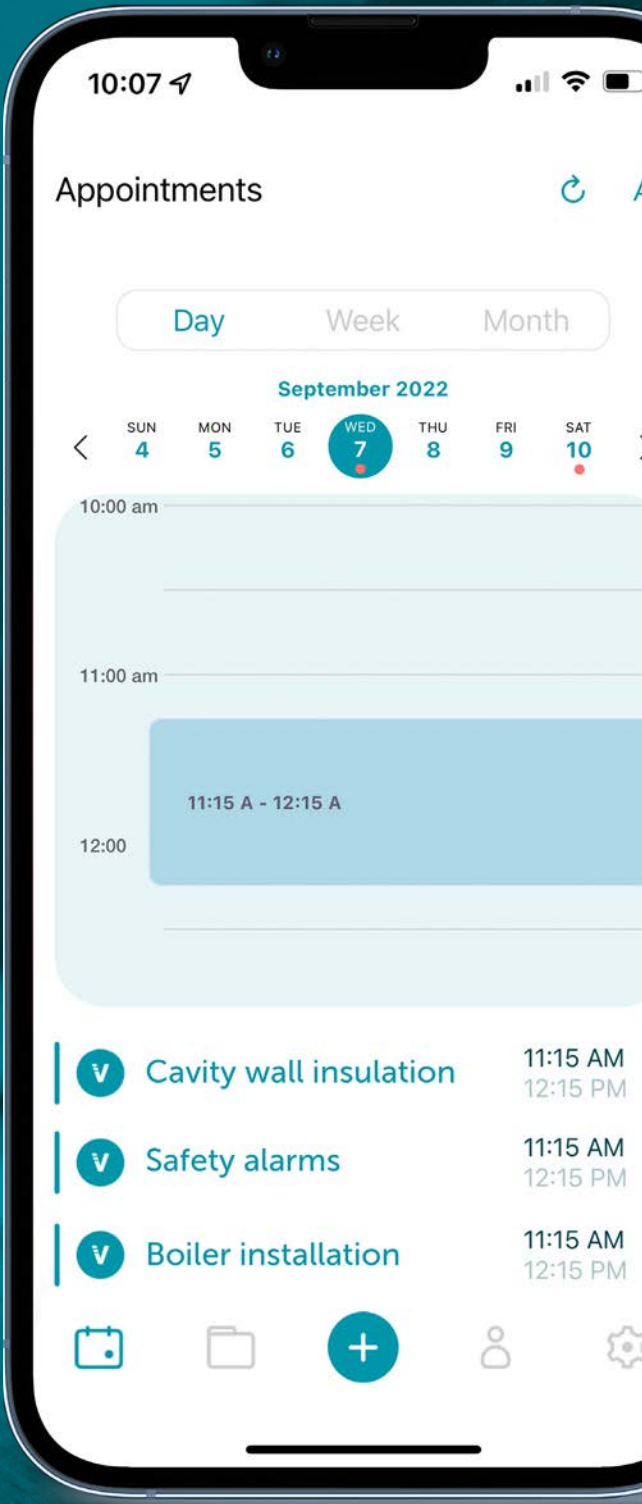

ECO Surv provides software solutions and mobile survey applications in workflow management for the ECO and Retrofit Industry.

Established in 2013, our experience in the energy and software sectors allows us to provide innovative, cutting-edge software solutions and technology to support our customers with end-to-end PAS compliant project delivery.

Our platform provides full end-to-end management of PAS 2035:2019 jobs, streamlining the workflow process for Installers and Retrofit Coordinators undertaking PAS 2035 retrofit work under multiple schemes. This includes ECO, GBIS, SHDF, LAD, HUG – and with our state-of-the-art software, we can flex as more schemes get underway.

This bespoke workflow management solution is at the heart of what we do. Our customers can work on Lead Generation, Survey and eligibility checks all through to OFGEM compliance, installation and submission - and it can empower retrofit projects too.

Retrofit Coordinators can review documents, collaborate with installers within ECO Surv's installer network, and easily produce retrofit plans which can be lodged directly to Elmhurst and the TrustMark Data Warehouse (as required by PAS 2035).

Social Housing & the ECO Surv Platform

ECO Surv's platform works effectively for Social Housing providers, Housing Associations, Contractors and Local Authorities. Our stand alone Retrofit Coordinator Portal also allows you to complete jobs separately to your main organisation portal.

End-to-End Solution

Fully PAS2035 Compliant Approach.

Bespoke Service

Custom designed for your business.

Experienced Team

A variety of experience within our team to ensure full compliance.

Stand-alone Retrofit Portal

Portal specifically for Retrofit providers.

Data Stored in UK

All images and data in the ECO Surv platform are stored securely within the UK.

What Next?
