

Elmhurst Preferred Non Domestic Software

The following software is approved to create and lodge EPCs with Elmhurst. If you use any of these applications please notify us and provide evidence of training to use the software.

SBEM Software

HEVACOMP is design analysis software with an easy to use modelling tool to effectively calculate Part L compliance.

www.bentley.com

A web based application with a methodical approach to energy assessments. It is fully integrated with the Elmhurst lodgement facility for simplicity. Additional graphical interface can be added.

www.lifespansbem.com

DesignBuilder SBEM has a modelling tool which allows you to either import 3D models or to model your own building for assessment.

www.designbuilder.co.uk

G-ISBEM

This software is user friendly and can reduce the amount of time spent on data input. This software has a graphical interface which is easily used by those who have none or little prior CAD expertise.

www.g-isbem.com

IES software is a comprehensive 3-D modelling tool which allows you to perform a number of energy analysis calculations.

www.iesve.com

iSBEM

iSBEM is the basic CLG issued software which can easily be downloaded, free of charge, from the NCM website.

www.ncm.bre.co.uk

DEC Software England, Wales and Northern Ireland

IES has developed an alternative to the Governments ORCalc Display Energy certificate (DEC) software. IES (DEC Assessor) is a free web based DEC application

www.iesdec.com

Lifespan-DEC is a web based application, CIP updates are automatically added and no user intervention is required. The integration with Elmhurst streamlines the lodgement of Display Energy Certificates and Advisory reports.

www.lifespandec.com

OR Calc

OR Calc is the Government commissioned software used to produce Display Energy Certificates and Advisory Reports for public buildings. It is desktop software freely available to qualified DEC assessors via your accreditation scheme.

OR Toolkit

OR Toolkit is a module of the The SystemsLink software suite an Energy Monitoring and Targeting system but can operate on a standalone basis without the Energy Manager package.

http://www.sl2000.com/or_toolkit/default.html

EPLabel

EPLabel provides a user-friendly interface to generate DEC's and Advisory Reports in the government approved format, and adds a powerful data management tool which provides clear information about a building portfolio's energy performance, guides energy efficiency investment prioritisation and underpins best practice environmental reporting.

<http://www.eplabel.co.uk/>

DEC Software Scotland

OR Scotland

OR Calc is the Government commissioned software used to produce Display Energy Certificates and Advisory Reports for public buildings. It is desktop software freely available to qualified DEC assessors via your accreditation scheme.

To download the software please log into your members area Access Elmhurst and it can be found within the DEC section of My Documents At present this is the only software available to produce DEC's and AR's in Scotland.

If you are using software that is not on this list then please let us know as we may be able to accommodate

Should you have any queries or need assistance, please call our Non Domestic Team on

01455 883 231 or e-mail nondomestic-support@elmhurstenergy.co.uk

(Opening hours: Monday – Friday, 9am - 5pm)
